

FOR IMMEDIATE RELEASE

## **Vertical Communications Announces Availability of Vertical Summit 800 Platform**

*Supplementing the Vertical Summit business phone system for SMBs, Summit 800 offers cost-effective scalability and comprehensive UC features for medium enterprises*

**Santa Clara, Calif., November 30, 2015**—Vertical Communications®, a leading provider of business communications software and solutions, today announced the general availability of the Vertical Summit™ 800 Communications Platform, the newest addition to the family of Vertical Summit™ systems. The new Summit 800 is a feature-rich solution that delivers an extensive UC feature set including mobility and support for both VoIP and TDM network and device compatibility for optimum flexibility and cost efficiency. Supporting up to 400 users with a single system, the Summit 800 can quickly scale up to 800 users with an expansion unit and be easily networked across as many as 250 locations to address the needs of small- and medium-sized multi-location businesses.

“The Vertical Summit product family is a highly cost effective, feature rich and scalable communications platform designed for the needs of the small and medium business markets,” explained Peter Bailey, chief executive officer at Vertical Communications. “The Summit family is designed to provide the full range of phone and UC features that customers expect to drive their business communications, including conferencing and collaboration features, mobility applications, reporting and accounting functions. As customers look to add staff, new locations, or new features, the new Summit 800 is a scalable platform that will grow easily with their evolving business requirements and changing technologies.”

The Summit 800’s cost-effective hybrid IP/TDM architecture supports advanced UC and mobility applications for desktops and smartphones, giving office, remote and mobile workers easy access to a comprehensive range of features and tools including full presence management, click call capabilities, six-way videoconferencing, advanced call recording and reporting, unified messaging, auto attendant and automatic call distribution (ACD) capabilities.
